

# ANKITA NAG

Product Designer | UX/UI Designer | AI-Driven UX

Chennai, India | +91 7674002282 | [ankita.uxdesigner@gmail.com](mailto:ankita.uxdesigner@gmail.com)

LinkedIn: <https://www.linkedin.com/in/ankitanag> | Portfolio: <https://nag-ankita.github.io>

## SUMMARY

UX designer with nearly 5 years at Tata Consultancy Services, leading end-to-end design of enterprise, logistics and AI-powered products, including 1 year leading a design team. Turns complex, data-heavy workflows into clear experiences, builds consistent design systems across product suites, and backs design decisions with research and measurable results. Uses AI tools (Claude, ChatGPT, Gemini) to speed up research synthesis and prototyping.

## CAREER HIGHLIGHTS

- Raised user retention by **28%** and daily active users by **35%** on an enterprise learning platform, shipping 10+ features in 4 months.
- Cut shortlisting time by **40%** and lifted interview completion by **25%** by redesigning an AI interview coach (chat and voice).
- Reduced task time by **21%** and errors by **18%** across a logistics operations suite for a UK postal service.
- Conceived, pitched and shipped Codewars, a competitive coding feature that became one of the platform's most talked-about additions.
- Led a design team for 1 year; guest lecturer at NIFT Chennai; 3rd place at the Lollypop Designathon, Bengaluru.

## CORE SKILLS

**UX and Product Design:** User experience (UX) design, product design, interaction design, UI and visual design, information architecture, user flows, wireframing, prototyping, design systems, responsive web and mobile design, dashboards, data visualization

**Research and Testing:** User research, stakeholder and user interviews, surveys, personas, journey mapping, competitive analysis, usability testing, A/B testing, data-driven design

**Specializations:** Enterprise and B2B platforms, complex data-heavy interfaces, AI-driven UX, conversational UI (chat and voice), gamification, accessibility (WCAG), human-computer interaction (HCI), design thinking

**Leadership:** Design team leadership, stakeholder management, stakeholder workshops, design reviews, cross-functional collaboration with product and engineering, developer handoff

**Tools:** Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Miro, Framer. AI tools: Claude, ChatGPT, Gemini, Google Stitch

## PROFESSIONAL EXPERIENCE

### UX Designer, Tata Consultancy Services (TCS)

Dec 2021 - Present

- Lead UX end to end on four enterprise products for internal teams and a UK client: research, workflow analysis, user flows, high-fidelity UI, prototypes, usability reviews and developer handoff.
- Led a design team for 1 year, setting design direction and running design reviews while staying hands-on.

### Logistics Operations Platform, UK postal service client

Jul 2025 - Present

*Suite of platforms used by planners, operations teams and supervisors to plan, monitor and run daily postal operations.*

- Reduced task time by **21%** and errors by **18%** by redesigning workflows for duty planning and execution, arrival and departure, processing and journey management.
- Built a shared pattern kit (status chips, tags, filters, data tables, Gantt views, contextual actions) so every module works the same way; patterns pass contrast and keyboard accessibility checks.
- Designed one exception language (blocked, discrepancy, data quality, watch) used across tables, Gantt bars and detail views, so problems are recognized and acted on quickly.
- Ran stakeholder workshops and design reviews with business, operations, product and development teams.

### Gamified Learning Platform, internal upskilling product

Dec 2021 - Jul 2025

*Learning platform with courses, learning paths, certifications and hands-on challenges for employees, managers and admins.*

- Shipped 10+ features in 4 months, increasing retention by **28%** and daily active users by **35%** and reducing onboarding drop-offs by **22%** (platform analytics).
- Conceived, pitched and designed Codewars (head-to-head arena, seasonal leaderboard, credit wallet, rewards) and partnered with engineering to ship it.
- Designed the admin analytics dashboard that replaced separate reports and spreadsheets, and a role-based access control (RBAC) center that scales to new roles without redesign.

- Influenced the roadmap: made the case for platform-wide global search, turned the associate profile into skill levels for resource managers, and designed a skill competency scale, bootcamp hosting and event management.
- Delivered a full platform redesign with a consistent component system, approved by stakeholders and adopted as the reference for new features; fixed button accessibility across the product.

#### **Hands-On Challenge Platform, in-house authoring tool**

Dec 2021 - Jul 2025

*Tool for subject matter experts to create, review, publish and monitor technical challenges, replacing third-party vendors.*

- Interviewed 4-6 subject matter experts in person and mapped their journey, finding four core problems: fragmented tools, slow ticket-based fixes, no analytics and no collaboration.
- Designed a guided editor with test cases and live preview, co-authoring with in-context comments and review states, and live attempt monitoring, removing vendor dependency and support-ticket waits.
- Increased challenge completion by **27%**, reduced errors by **23%** and improved task success by **19%** (A/B tested).

#### **AI Interview Platform, internal AI interview coach (chat and voice)**

Nov 2024 - Jul 2025

*AI platform that coaches employees before client interviews; recruiters review the results.*

- Audited the product and synthesized candidate, recruiter and support feedback into design principles, without direct user access.
- Replaced a wall of instructions with a four-step flow (Welcome, Instructions, Warm-up, Interview) and a friendly AI avatar that explains how evaluation works; completion rose **25%** and repeat usage **32%**.
- Redesigned the recruiter dashboard as summary-first, action-driven reports, cutting shortlisting time by **40%**; one consistent palette, type scale and component set reduced rework by **18%**.

#### **Womenswear Designer, Nandani Creations**

Mar 2019 - Jun 2019

- Designed womenswear collections from concept and trend research to finished garments, increasing sales by **20%**.

#### **Assistant Womenswear Designer, C.N. Dezine Studio**

Mar 2018 - Nov 2018

- Supported womenswear design and collection development: concept research, mood boards, illustration and garment development.

### **SELECTED PROJECTS**

#### **Portfolio Website, <https://nag-ankita.github.io>**

2026

- Designed and directed the build of a responsive React portfolio using Claude for AI-assisted development, with light and dark themes, reduced-motion support and 14 case studies.

#### **Bespoke Town, AI-assisted custom tailoring mobile app**

2025

- Led end-to-end UX: competitor analysis, survey of 16 users (93% struggled with fit when buying online), information architecture, user flows, high-fidelity prototype and user testing.

#### **UX Case Studies: Save Earth, FlowerBee, BellCafe, LightBulb**

May 2021 - Nov 2021

- Designed four mobile and responsive web products end to end in Figma and Adobe XD; 4 usability studies with 20 participants drove changes to navigation, checkout, payment options and color contrast.

### **EDUCATION**

#### **Bachelor of Design (B.Des), National Institute of Fashion Technology (NIFT), Hyderabad**

2013 - 2017

- Graduation runway collection, Nature's Wardrobe, was covered by The Hindu (2017).

#### **ISC (Commerce), City Convent School, Lucknow**

2010 - 2012

### **CERTIFICATIONS**

- Human-Computer Interaction (HCI), Interaction Design Foundation (IxDF), 2024
- Design Thinking: Customer Experience, LinkedIn Learning, 2023
- Google UX Design Professional Certificate, Coursera, 2021

### **ADDITIONAL**

- Guest Lecturer, National Institute of Fashion Technology (NIFT), Chennai
- 3rd place, Lollypop Designathon, Bengaluru
- Participant, Madras Management Association (MMA) Competition for Young Managers
- Languages: English, Hindi
